Re: Implementing a Nationwide, Broadband Interoperable Public Safety Network in the 700 MHz Band, PS Docket No. 06-229; Public Safety and Homeland Security Bureau Seeks Comment on Multiline Telephone Systems Pursuant to the Next Generation 911 Advancement Act of 2012, CC Docket No. 94-102, WC docket No. 05-196, PS Docket No. 07-114, PS Docket No. 10-255; Transition Process for 700 MHz Public Safety Broadband Waiver Recipients, PS Docket No. 12-94

Dear Ms. Dortch:

On June 14, 2012, NATOA's Executive Director Steve Traylor, Immediate Past President Ken Fellman, and Board Members Lori Sherwood and Barry Fraser met with Public Safety & Homeland Security Bureau Chief David Turetsky and PSHS representatives Jennifer Manner, Erika Olsen, Brian Hurley, and Rasoul Safavian to discuss issues of importance to local governments and their constituents. Among the issues we discussed were the deployment of next generation 911 services and the deployment of the nationwide public safety wireless broadband network. More specifically, we mentioned the pending issue of how the Commission would handle waiver recipients and the minimum technical requirements for the network submitted by the technical advisory board. We discussed that NATOA would be filing comments with the NTIA on the state and local grant program and would continue its efforts to inform local officials about the proposed network and the role local governments would play in its deployment and use.

We also briefly discussed the pending proceeding dealing with multiline telephone systems and next generation 911 services.
